

MARCO ZANOTTI

I am a machine learning engineer and data scientist with broad knowledge in time series analysis, forecasting, anomaly detection, and econometrics. I specialized in developing and enhancing business forecasting processes and practices. Over the years I developed and contributed to core forecasting systems in sectors like e-commerce fashion, airline, tourism and travel. I also guided and mentored junior colleagues in developing predictive models that enable accurate forecasting. I am passionate about advancing the field of forecasting and fostering collaboration between academia and industry. I do academic work in forecasting, and I am a member of the International Institute of Forecasters. Recently I have enjoyed teaching professionals and university students about time series analysis, machine learning, programming, and statistics.

PROFESSIONAL EXPERIENCE

current
|
2022

- **Ph.D. Student, Statistics**
University of Milano-Bicocca  Milan, Italy
 - Research on time series forecasting, cross-learning, forecasting stability, time series foundation models (LLMs), and sustainable AI

2024
|
2024

- **Data Scientist, Forecasting Specialist**
Wanan Luxury - E-commerce Fashion - Full remote  Rome, Italy
 - Led the company's time series forecasting projects
 - Coordinated and contributed to the development of a forecasting tool to predict future demand for tens of thousands item-level (SKUs) time series across several markets worldwide, and with different product hierarchies, resulting in increased forecasting accuracy and efficiency
 - Integrated probabilistic methods to support more informed inventory decisions
 - Designed and developed an app for evaluating forecasting experiments, enhancing reliability of the analyses
 - Provided mentorship to junior colleagues, supporting their professional growth and development in the field of forecasting

2024
|
2021

- **Data Scientist**
Blogmeter - Digital Services - Hybrid  Milan, Italy
 - Integrated machine learning solutions into the main applications of the company
 - Developed an anomaly detection solution to promptly communicate relevant events to the clients
 - Coordinated the Product team

2021
|
2020

- **Data Scientist**
T-Voice - Digital Services - Full remote  Milan, Italy
 - Contributed to the development of an AI platform for the analysis of textual data
 - Effectively incorporated text data into forecasting models
 - Coordinated the R&D team

Core Skills

High experience in time series modeling and forecasting, ML modeling and text mining

Languages

2020
|
2017

Junior Data Scientist

Uvet Amex GBT - Tourism and Aviation - Hybrid

📍 Milan, Italy

- Developed and maintained diverse statistical and machine learning models to predict: sales at different aggregations to support strategic decisions; daily inbound calls to optimize scheduling hours; air passenger demand over several destinations to support aircraft planning; business car rental demand to support fleets management
- Successfully improved the approach to forecasting, resulting in a significant reduction of errors and facilitating the faster adoption of machine learning solutions by the business
- Implemented an anomaly detection system to signal possible congestions in the company's reservation systems
- Developed econometric models to measure key drivers of business travel and tourism
- Supported automation processes implementing OCR solutions

TEACHING EXPERIENCE

current
|
2019

Adjunct Professor

University of Milan - Hybrid

I teach modern time series forecasting, machine learning, coding, and statistics.

AWARDS

- 2025 • **IIF-SAS Forecasting Research Grant**
International Institute of Forecasters - SAS
- 2025 • **International Symposium on Forecasting Award**
International Institute of Forecasters 📍 Beijing, China

CONFERENCES & SEMINARS

- 2025 • **Do global forecasting models require frequent retraining?**
International Symposium on Forecasting 📍 Beijing, China
- 2021 • **Computing Disposition Effect on Financial Market Data**
useR! 2021 Conference 📍 Remote

EDUCATION

- current | 2022 • **Ph.D., Statistics**
University of Milano-Bicocca 📍 Milan, Italy

Research on time series forecasting, cross-learning, forecasting stability, time series foundation models (LLMs), and sustainable AI
- 2018 • **Post-graduate, Data Science for Economics, Business and Finance**
University of Milan 📍 Milan, Italy
- 2017 | 2015 • **M.Sc., Economics and Finance**
University of Milan 📍 Milan, Italy
- 2014 | 2011 • **B.Sc., Political Sciences and International Relations**
University of Parma 📍 Parma, Italy
ERASMUS, University of Lapland, Rovaniemi, Finland

Certificates

- **Certified Forecaster and Demand Planner**, ISCEA
- **High-Performance Time Series Forecasting**, BS University
- **Time Series Analysis**, CAC IIT
- **Deep Learning for Sequence Modelling and Times Series**, Deep Learning Italia
- **Python for Machine Learning and APIs**, BS University
- **Python for Data Science Automation**, BS University
- **Shiny Web Applications**, BS University
- **Macroeconometric Forecasting**, IMF

Sports & Hobbies

I was a footballer. I played in Italian minor championships until 22. Now I practice kitesurf, an amazing waterboard sport, and I do canicross with my little friend Milo.

I like manga, boardgames, videogames, curling and footgolf. I love listening folk and country music.

PERSONAL COMPETENCES

● **Organisational and Management**

- Project management: I coordinated the development of different projects, from analysis to implementation
- People management: I coordinated the activities of junior colleagues, supervising and guiding in their professional development
- High relational and communication skills
- High resistance to stress
- Since 2020 I proficiently work from remote
