

MARCO ZANOTTI

I am a data scientist with broad knowledge in time series analysis, forecasting, anomaly detection, and econometrics.

I specialized in developing and enhancing business forecasting processes and practices. Over the years I developed and contributed to core forecasting systems in sectors like e-commerce fashion, airline, tourism and travel. I also guided and mentored junior colleagues in developing predictive models that enable accurate forecasting.

I am passionate about advancing the field of forecasting and fostering collaboration between academia and industry. I do academic work in forecasting, and I am a member of the International Institute of Forecasters. Recently I have enjoyed teaching professionals and university students about time series analysis, machine learning, programming, and statistics.

PROFESSIONAL EXPERIENCE

- 2026**
|
2026
● **Researcher, Forecasting Specialist**
iqast - Software - Full remote 📍 Hamburg, Germany
- 2025**
|
2024
● **Data Scientist, Forecasting Specialist**
Wanan Luxury - E-commerce Fashion - Full remote 📍 Rome, Italy
- 2024**
|
2021
● **Data Scientist**
Blogmeter - Digital Services - Hybrid 📍 Milan, Italy
- 2021**
|
2020
● **Data Scientist**
T-Voice - Digital Services - Full remote 📍 Milan, Italy
- 2020**
|
2017
● **Junior Data Scientist**
Uvet Amex GBT - Tourism and Aviation - Hybrid 📍 Milan, Italy

TEACHING EXPERIENCE

- current**
|
2019
● **Adjunct Professor**
Education - Hybrid

EDUCATION

- 2026**
|
2022
● **Ph.D., Statistics**
University of Milano-Bicocca 📍 Milan, Italy
- 2018**
● **Post-graduate, Data Science for Economics, Business and Finance**
University of Milan 📍 Milan, Italy
- 2017**
|
2015
● **M.Sc., Economics and Finance**
University of Milan 📍 Milan, Italy
