

# MARCO ZANOTTI

I am a machine learning engineer and data scientist with broad knowledge in time series analysis, forecasting, anomaly detection, and econometrics. I specialized in developing and enhancing business forecasting processes and practices. Over the years I developed and contributed to core forecasting systems in sectors like e-commerce fashion, airline, tourism and travel. I also guided and mentored junior colleagues in developing predictive models that enable accurate forecasting. I am passionate about advancing the field of forecasting and fostering collaboration between academia and industry. I do academic work in forecasting, and I am a member of the International Institute of Forecasters. Recently I have enjoyed teaching professionals and university students about time series analysis, machine learning, programming, and statistics.

## PROFESSIONAL EXPERIENCE

current  
|  
2022

- **Ph.D. Student, Statistics**  
University of Milano-Bicocca  Milan, Italy
  - Research on time series forecasting, cross-learning, forecasting stability, time series foundation models (LLMs), and sustainable AI

2024  
|  
2024

- **Data Scientist, Forecasting Specialist**  
Wanan Luxury - E-commerce Fashion - Full remote  Rome, Italy
  - Led the company's time series forecasting projects
  - Coordinated and contributed to the development of a forecasting tool to predict future demand for tens of thousands item-level (SKUs) time series across several markets worldwide, and with different product hierarchies, resulting in increased forecasting accuracy and efficiency
  - Integrated probabilistic methods to support more informed inventory decisions
  - Designed and developed an app for evaluating forecasting experiments, enhancing reliability of the analyses
  - Provided mentorship to junior colleagues, supporting their professional growth and development in the field of forecasting

2024  
|  
2021

- **Data Scientist**  
Blogmeter - Digital Services - Hybrid  Milan, Italy
  - Integrated machine learning solutions into the main applications of the company
  - Developed an anomaly detection solution to promptly communicate relevant events to the clients
  - Coordinated the Product team

2021  
|  
2020

- **Data Scientist**  
T-Voice - Digital Services - Full remote  Milan, Italy
  - Contributed to the development of an AI platform for the analysis of textual data
  - Effectively incorporated text data into forecasting models
  - Coordinated the R&D team

2017

## Junior Data Scientist

Uvet Amex GBT - Tourism and Aviation - Hybrid

📍 Milan, Italy

- Developed and maintained diverse statistical and machine learning models to predict: sales at different aggregations to support strategic decisions; daily inbound calls to optimize scheduling hours; air passenger demand over several destinations to support aircraft planning; business car rental demand to support fleets management
- Successfully improved the approach to forecasting, resulting in a significant reduction of errors and facilitating the faster adoption of machine learning solutions by the business
- Implemented an anomaly detection system to signal possible congestions in the company's reservation systems
- Developed econometric models to measure key drivers of business travel and tourism
- Supported automation processes implementing OCR solutions

## TEACHING EXPERIENCE

current  
|  
2019

## Adjunct Professor

Education - Hybrid

I teach modern time series forecasting, machine learning, coding, and statistics in both Master and Bachelor degrees at the University of Milan, and in other major Italian universities

## AWARDS

- 2025 • **International Symposium on Forecasting Award**  
International Institute of Forecasters Beijing, China

## CONFERENCES & SEMINARS

- 2025 • **Do global forecasting models require frequent retraining?**  
International Symposium on Forecasting Beijing, China
- 2021 • **Computing Disposition Effect on Financial Market Data**  
useR! 2021 Conference Remote

## EDUCATION

- current  
|  
2022 • **Ph.D., Statistics**  
University of Milano-Bicocca Milan, Italy  
  
Research on time series forecasting, cross-learning, forecasting stability, time series foundation models (LLMs), and sustainable AI
- 2018 • **Post-graduate, Data Science for Economics, Business and Finance**  
University of Milan Milan, Italy
- 2017  
|  
2015 • **M.Sc., Economics and Finance**  
University of Milan Milan, Italy
- 2014  
|  
2011 • **B.Sc., Political Sciences and International Relations**  
University of Parma Parma, Italy  
ERASMUS, University of Lapland, Rovaniemi, Finland

## PERSONAL COMPETENCES

- **Organisational and Management**
- Project management: I coordinated the development of different projects, from analysis to implementation
  - People management: I coordinated the activities of junior colleagues, supervising and guiding in their professional development
  - High relational and communication skills
  - High resistance to stress
  - Since 2020 I proficiently work from remote

## Certificates

- [Certified Forecaster and Demand Planner](#), ISCEA
- [High-Performance Time Series Forecasting](#), BS University
- [Time Series Analysis](#), CAC IIT
- [Python for Machine Learning and APIs](#), BS University
- [Python for Data Science Automation](#), BS University
- [Shiny Web Applications](#), BS University
- [Macroeconometric Forecasting](#), IMF

## Sports & Hobbies

I was a footballer. I played in Italian minor championships until 22. Now I practice kitesurf, an amazing waterboard sport, and I do canicross with my little friend Milo.

I like manga, boardgames, videogames, curling and footgolf. I love listening folk and country music.
